

Master Street Plan Map

The Master Street Plan map shows the existing street network, as well as the approximate location of future street connections and improvements. Flexibility in the exact alignments is allowed based on constraints and practicalities, but the connections indicated are important and will be required as development occurs. The City of Bentonville's transportation system is interconnected with adjacent cities as well as areas of unincorporated Benton County. This Master Street Plan map and future connections were coordinated with the County and surrounding communities to assure congruence with the regional transportation network.

Changes from the 2008 Master Street Plan are shown on the Amendments Map at the end of this document.
